1. Is this a tablet?

No. This is a multifunctional audiovisual device, which does not have an operating system and a touch screen. It is developed to present your videos. With the help of a magnetic lock, it senses the opening, then it automatically starts your film with sound. The sound can be switched off anytime by pressing the push-button.

2. Can I change videos on the Cinematicon?

Of course, and as many times as you want. With the help of the USB cable, you can not only upload the device, but also change the videos on it. Up to 1 GB you can upload any number of videos to it, which start one after the other at opening. If you do not need one of the videos anymore, just delete it.

3. What kind of films can I upload to the Cinematicon?

General MP4 format videos. Any number of films can be uploaded to the device up to 1 GB. In this case, they start automatically one after the other.

4. How long can I use the Cinematicon with one charge?

When loaded completely, approximately 300 openings and video viewings are feasible with one charge. The device does not discharge when it is closed.

5. How can the Cinematicon be loaded and how long does it take?

Each Cinematicon goes with a USB cable, with which it can be loaded. Charging a fully discharged device takes approximately 1.5 hours.

6. Are there any additional costs?

There are no further costs besides the package prices indicated on our website. We cover the postal fee, we also provide you with the USB cable necessary for the loading of the device and changing of the videos. No extra costs occur in case of the video uploading, either.

7. Is there any mandatory element on the cover?

Yes, the Cinematicon logo on the back of the product. We are sending a layout in advance of each package designed by us for checking and approval.

8. Can the video file be closed on the Cinematicon so that it could not be accessible or deleted afterwards?

Yes, it is a possible function, which, however, has to be indicated before production, since the necessary operations need to be carried out at the beginning of production process. Unfortunately, this cannot be modified after the production and assembly of the device.

9. What are the differences among the packages?

Our **“Basic”** package consists of a white Cinematicon decorated with your brand logo (with foil sticker), and we upload your already existing video onto it (if you have one).

Our **“Standard”** package already includes the creation of your cover’s unique graphic by our designer team, too. Each cover is prepared based on your individual demands, after prior consultation.

Our **“Premium”** package also includes your Cinematicons with unique cover, as well as a video made especially for you. In case of this category, you can request a unique offer at the info@animatiqua.com email address. You can check our previous reference films on our [website](#).

10. How does the design process look like?

Before placing your order (or even afterwards, in case of prior consultation), write us to our info@animatiqua.com email address. To design your cover, send us your vector logo, your images (in the highest possible resolution), and your brand guidelines. If you already have specific ideas regarding your cover, share them with us. In case of the Premium package, you can also request a quotation for a custom-made film. We will continue to keep in touch with you, until your Cinematicon arrives to you.

11. What exactly is meant by Premium package?

In case of ordering a Premium package, if you want the Cinematicons, but you do not have a film yet to upload on them, we will help you make that too. This is a separate film production process, and in case you contact us, we can also prepare your video itself, should it be an animation, image film, infographics, or any other type of motion picture material.
